- Mission & Performance Assessment
- Gap Analysis
- Needs Assessments
- Change Management
- Acquisition Strategy

Systems Engineering

- Workflow Analysis
- Process Improvement
- Enterprise Architecture
- COTS System Integration
- Analysis of Alternative (AoA) Solutions
- Enterprise Lifecycle Independent Verification and Validation (IV&V)

Innovation

- Research & Development
- Intelligent Object Tracking
- Disaster Casualty Management
- App Development for Smart Devices

Program Support

- Program Management
- Quality Assurance
- Risk Management
- Acquisition Management
- General Administrative Staffing
- Subject Matter Expert Staffing

Afilon was founded by accomplished top-tier engineers, scientists, and social scientists with experience in some of the most prominent research and development (R&D) corporations and institutions in the United States, including:

The Institute of Medicine, MITRE, Noblis, IITRI, the U.S. Institute of Peace and the Air Force.

The relationship dynamic of these organizations and the federal government, to work in the best interest of the government and the greater public, has been the underpinning of our experiences and is the orientation and guiding principle by which we work.

541512	561621	519120	541513	541330
541519	541611	541618		
541690	541710			

Contract Vehicles

- 8(a) SDB
- GSA Schedule 70
- TIPSS-4 (sub to Accenture)
- SeaPort-e
- Maryland CATS II
- R2-3G (sub to Aaski)

Partners

MITRE • Noblis • SAIC • BAE • Accenture • TCAssociates

A Preview of Our Impact

“Over these many months I have come to appreciate how much work it takes to think and act in new ways. [Afilon] provided great value to the command by applying your intellect and meticulously engineering new structures, functions, governance, relationships, duties, performance references and measures for an age old mission. Nothing can be more important than providing world class care and caring for those healing heroes who were wounded in battle... I am grateful for your support of current operations in bringing new technology to pre-hospital contingency management and responsiveness aspect of the Commander's mission.”

- Amir Adolphe Edward, Col, USAF, MSC, Chief of Staff

Contributed to development of strategy for Joint Military Medicine.

Automated Federal tax submissions and refunds – remember filing on paper?

“I have found [Afilon's] work to be exemplary, and its staff to be knowledgeable, current, dependable, and able to work in a professional and suitable manner under pressure and within short deadlines. It is with great pleasure that I recognize [Afilon's] contributions to the IRS modernization program and strongly recommend their professional capabilities.”

- Daniel C. Horsey, Former Director of Enterprise Architecture, IRS

“We met Afilon through our DoD counterparts... they used them to help develop a set of work-flows and requirements for a new IT system they are taking live soon that will link to our systems. I'm normally not a big fan of using contractors, but the Afilon team was extremely impressive. After just 1 extended interview session with us, they were able to document the workflows and systems as if they had been on our staff for years.”

- Zachary Corrigan, Executive Director, Northern Virginia Hospital Alliance

Strengthened emergency medical response and resiliency.

Helped stabilize the Afghan economy.

“Throughout the past year, [Afilon] exuded professionalism, collegiality and collaboration in all of its interchanges [and] maintained a successful relationship with OCONUS Task Force stakeholders, Afghanistan Government and business representatives as well as with local Afghanis. This contributed greatly in supporting the TFBSO leadership in assessing security and potential business development throughout Afghanistan... In some of our program areas [Afilon] is now the "go-to" vendor to provide solutions to problems.”

- DoD Task Force for Business and Stability Operations (TFBSO)
